

# J&L's Cargo Express

---

*A late night fire in an air compressor room resulted in extensive fire, smoke and water damage to J&L's Cargo Express in Bristol, Indiana.*

***First Response** quickly mobilized and relocated salvageable equipment to an off-site location to allow J&L's to maintain 100% production during the reconstruction of the damaged building. The 45,000 square foot building was then brought up to code, redesigned to improve efficiency, and fully restored.*

*One of the owners, Lyle Miller said, "I don't know what I would have done if First Response wouldn't have shown up that day. I am glad we hired First Response, you did a great job and everything you said you were going to do, you did."*
